

A celebration of the couple's Mexican heritage shone through in the gorgeous rancho setting, the vibrant floral arrangements and the warm love that enveloped them from their family and friends.

*details of distinction*

*their love story*

Sandra and Francisco met one another when she came in to dine at the restaurant in which he worked. Needless to say, her lunch break was a lingering one! The couple spent six years together and Francisco knew he would propose to his love, Sandra. The kids found out about the pending engagement and did not want to keep the wonderful event a secret too long. With family by his side, Francisco asked for Sandra's hand in marriage on Christmas Eve.

We all have special wishes when it comes to our wedding day, however, Sandra and Francisco's wedding has an extra special heartfelt story attached to their big day. Sandra's 15-year-old son, Anthony, was diagnosed with acute lymphocytic leukemia. His wish was to be able to see his mother marry Francisco. Francisco and Sandra take turns caring for Anthony and his siblings Alyssa, Isaac and Isaiah. Some days include time in the hospital or spending time with Anthony while he receives his chemotherapy treatments. While one is working, the other is caring for the children. Their time with one another is limited and very precious. With the assistance of Wish Upon a Wedding of Southern California and their fabulous wish makers who donated time, talent and resources, this beautiful couple and family received their dream wedding, granting sweet Anthony's wish!
